

Environmental Community Line

A direct way to share environmental feedback with Sims Metal.

At Sims Metal, we want to be a responsible neighbour in the communities where we operate.

Our Environmental Feedback Line gives community members a simple, direct way to let us know about environmental concerns related to our sites or operations.

Contact Us If You Notice Things Like:

- Dust, noise, odour or run-off concerns
- Environmental impacts near one of our sites
- Anything else you believe may affect the local environment

What Happens When Feedback is Submitted

Every submission is reviewed by our environmental and site teams. Where needed, concerns are investigated and actions are taken in line with our environmental responsibilities. All investigation findings and actions will be reported back.
